

# Avipel™

## SPECIMEN LABEL

EPA Reg. No. 69969-1-79601

EPA Est. No. 62171-MS

**ACTIVE INGREDIENT**

9, 10 anthraquinone ..... 50%

OTHER INGREDIENTS ..... 50%

Total 100%

**For Best Results: Product may separate if allowed to sit. Resuspend with agitation. Keep from freezing.**

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**USE RESTRICTIONS:**

This product may be used to repel geese, including Canada geese.

**For Professional Application on Structural Surfaces.**

- Repels geese from terrestrial areas at or near airports.
- Repels geese from commercial sites, industrial sites, municipal sites or in developed urban areas.
- Repels geese from ornamental nurseries, and conifer nurseries.
- Repels geese from landfills and dumpsites.
- Repels geese from building roofs, window sills and ledges.

To prevent contamination of the dilute solution of Avipel™ by other chemical residues, be sure that the equipment is thoroughly clean before use or use dedicated equipment.

Apply this product using properly calibrated and maintained spray equipment. Do not apply when surface to be treated is wet or when rain is expected. **For best results, allow product to dry on surface prior to rainfall.**

For application by professional applicators only. Do not apply this product in a way that will contact workers or other persons, either directly or through drift.

**MIXING DIRECTIONS:**

Thoroughly shake or stir Avipel™ prior to diluting with water.

**APPLICATION DIRECTIONS:**

When geese have been begun to flock in one area and are problematic, apply Avipel™ according to the following rates to the areas where geese are expected to feed/roost. To determine if the geese are problematic, conduct a visual inspection (bird count) by a responsible officials/parties before application.

**Landfills, Dumpsites:**

- In most cases, dilute 2 quarts of Avipel™ with 50 gallons of water and apply per acre of surface (1.5 oz. Avipel™ per 1,000 sq. feet). You might need to use as much as one gallon diluted in 50 gallons of water per acre for extreme bird pressure. Your supplier will provide individualized assistance on concentrations to be used under existing conditions.
- Mix with water based on spray equipment specifications and recommendations.
- Apply using a fine spray pattern to evenly distribute over entire surface to be treated.
- Allow material to dry before permitting human activity in the treated area.
- Spray at weekly intervals or as required by geese activity and anticipated seasonal migrations.

KEEP OUT OF REACH OF CHILDREN <b>CAUTION</b>	
FIRST AID
